PROFESSIONAL SUMMARY

MCA graduate (2026) with a 3-month Java Full Stack internship in Java, Spring Boot, REST APIs, Angular, JPA/Hibernate, and MySQL. Built full-stack apps and a JWT-secured microservices banking backend with Docker and GitHub Actions CI, deployed on Render. Solid in data structures and algorithms, with JUnit and Mockito unit testing experience.

SKILLS

Languages: Java, JavaScript, TypeScript, SQL
Frontend: Angular, HTML5, CSS, SCSS, Tailwind CSS
Backend: Spring Boot, Spring Security, REST APIs, Spring Data JPA, Hibernate, JWT, Eureka, OpenFeign
Database: MySQL, TiDB Cloud
Tools: Git, GitHub, Maven, Docker, Postman, Swagger/OpenAPI, GitHub Actions (CI/CD), Render, Vercel, Cloudinary
Testing: JUnit, Mockito
Concepts: OOP, Data Structures & Algorithms, MVC Architecture, Microservices, Dependency Injection

PROFESSIONAL EXPERIENCE

Java Full Stack Developer Intern **Feb 2026 – May 2026**
Ethnotech Academic Solutions Pvt. Ltd.

- Built two full-stack applications, Aurevia (e-commerce) and a Social Media Platform, using Angular, Spring Boot, and MySQL.
- Developed REST APIs for cart, wishlist, user, and product modules and connected them to the Angular frontend.
- Used Spring Data JPA and Hibernate for database operations.
- Tested and debugged APIs using Postman and Swagger UI.

PROJECTS

1. Banking System – Microservices Backend
GitHub: github.com/harshi2829/Banking-Microservices-Backend
Tech Stack: Spring Boot, Microservices, Eureka, OpenFeign, JWT, Docker

- Built a Spring Boot microservices banking backend with separate services for authentication, accounts, and transactions, communicating through Eureka service discovery and OpenFeign.
- Implemented JWT authentication with Spring Security and BCrypt password encoding; each service validates the token independently.
- Wrote unit tests with JUnit and Mockito and set up GitHub Actions to run them on every push.
- Dockerized the services and deployed them on Render, using TiDB Cloud as the production database.

2. Aurevia – Jewelry E-Commerce Platform
GitHub: github.com/harshi2829/Aurevia-Ecommerce-Platform
Live Demo: aurevia-frontend-silk.vercel.app
Tech Stack: Angular, Spring Boot, MySQL, Tailwind CSS

- Developed 10+ REST APIs with Spring Boot for cart, wishlist, user, and product management.
- Restricted cart and wishlist access so users can only view and modify their own data.
- Fixed a CORS configuration issue between the Angular frontend and Spring Boot backend, and resolved a Hibernate StaleObjectStateException caused by incorrect handling of userId in the cart module.
- Containerized the backend with a multi-stage Dockerfile and deployed it on Render, with the Angular frontend on Vercel.

3. Social Media Application
GitHub: github.com/harshi2829/Social-Media-PlatForm
Tech Stack: Angular, Spring Boot, MySQL, SCSS

- Built a full-stack social media app with registration, login, profile management, and a post feed with image uploads, likes, and comments.
- Developed 10+ REST APIs with Spring Boot for posts, likes, comments, and profiles, and used Cloudinary for image storage.
- Connected the Angular frontend to these APIs and used Route Guards to restrict pages to logged-in users.
- Users can view and delete their own posts and edit their username and bio from the profile page.

EDUCATION

Master of Computer Applications (MCA) **2024 – 2026**
Visvesvaraya Technological University, Mysuru

Bachelor of Computer Applications (BCA) **2021 – 2024**
Yuvaraja's College, University of Mysuru
